

Introduction to QGIS Course

Date: August 24-25, 2017

Cost: \$700/student

Skill Level: Beginner - Intermediate

This is a two-day course that will teach students how to use the widely popular open source QGIS desktop GIS software. In this course we will help users learn how to use the QGIS Desktop software to create and edit GIS data and perform simple, but useful spatial analysis. This course is designed so users that are not familiar with GIS can learn the basics of GIS.

- Overview of QGIS
 - What is QGIS
 - Why use open source
 - The QGIS user interface
- Working with GIS data
 - Vector data
 - Raster data
 - Tabular data
 - Web Mapping Services
 - Symbology
 - Selecting data
 - Spatial analysis
- Creating maps
 - Composing a map document
 - Adding map elements
 - Printing maps
- Working with plugins
 - What are plugins
 - Installing plugins

Class will run from 8:00 AM to 4:30 PM each day and each student will receive a certificate of completion for 16 hours of training.
